## decal calender paper protection 20

### DURABILITY

- Shelf Life: 12 months from the date of manufacture, applicable only to material that has not been processed, and stored according to the following conditions:
- This material must be stored at a temperature of  $20^{\circ}\text{C} \pm 5^{\circ}\text{C}$  and  $50\% \pm 5\%$  relative humidity, without major climate deviations.
- The storage area must be dry and clean.
- Keep the material in the original package when not in use, in order to protect it from dust and contamination.
- Do not expose to direct sunlight or heat sources.
- The product must be stored vertically, so that its quality is not compromised.

---

### APPLICATION

- Protection of the calender felt during the sublimation process.
- The protective paper must be dry and free from creases or wrinkles.
- If the fabrics or knits are thin or very open, special attention should be paid to the maintenance of the calender.
- Use two sheets of this paper if you have large masses of ink on the printing paper.
- There may be other factors not described that may influence the performance in the use.

---

### IMPORTANT REMARKS

- Decal is not responsible for the ease or speed of removal of the applied material. It is necessary to have into account the appropriate air and substrate temperatures.
- The user must determine the material's compatibility with the intended specific application, before using it.
- The data provided in this information is based on our knowledge and experience. It is intended to be a source of information and is not a guarantee. It can be subject to change without previous notice.
- Decal is not responsible for misuse or improper storage, never being responsible for loss or damage to third parties.
- Decal is not responsible for removing the paper for later recycling or product end-of-life cycle.
